REQUIREMENT RR/HTA/E/R14/57: Describe changes since World War II in the Kovrov Railroad Station, Yard and Shops.

REMARKS:

The Kovrov Railroad Station, Yard and Shops, located 46 miles south-southeast of Ivanovo, on the Moscow-Gor'kiy rail line, furnishes passenger and freight facilities for the city, and performs limited classification service for the branch line to Murom.

A comparison of photography with that of reveals no significant change in trackage or functions of this installation. However, a double-track railroad bridge 850 feet long has been constructed across the Klyazma River just west of the city, replacing the former structure.
